SUMMARY

3rd-year CS undergraduate skilled in full-stack web development with React.js, Next.js, Node.js, and TypeScript. Experienced with real-time systems (Socket.IO, WebRTC), AI integrations, and database design. Passionate about building scalable, production-ready web applications and contributing to high-impact engineering teams.

EDUCATION

Lakshmi Narain College of Technology Excellence

B.Tech in Computer Science Engineering

2023 – 2027

DAV Public School, Sawang

Senior Secondary Schooling

2022

DAV Public School, Sawang

Secondary Schooling

2020

PROJECTS

IOTA – Technical Interview Platform | [Live](#) | [GitHub](#) | [Video Demo](#)

- Engineered a full-stack real-time interview platform using **Next.js 16**, **TypeScript**, and **Socket.IO**, enabling sub-100ms collaborative code editing and live video sessions via **WebRTC** peer-to-peer communication
- Integrated **Google Gemini AI** for difficulty-based interview question generation and built an interview proctoring system with tab-switch detection and activity monitoring
- Designed relational data models with **PostgreSQL** and **Prisma ORM**; implemented role-based authentication using **NextAuth.js** with Google OAuth; architected bidirectional chat, screen sharing, and audio/video controls with TURN/STUN integration for NAT traversal

FitVerse – AI Fashion E-Commerce Platform | [Live](#) | [GitHub](#) | [Video Demo](#)

- Built an end-to-end fashion e-commerce platform with **React.js**, **Node.js**, and **Express.js**, featuring an AI-powered virtual try-on using **IDM-VTON** (ECCV 2024) via **Hugging Face** Gradio inference APIs
- Implemented secure **JWT** authentication with **bcrypt** password hashing, persistent cart management, order tracking, and a customer feedback system with **MongoDB** and **Mongoose**
- Integrated **Razorpay** payment gateway and **Cloudinary** for image uploads; developed an admin panel for product and order management with role-based access control

CivicConnect – Govt. Scheme Discovery Platform | [Live](#) | [GitHub](#) | [Showcase](#)

- Developed a civic-tech web application using **Node.js**, **Express.js**, **MongoDB**, and **EJS** that delivers personalized government scheme recommendations based on user profile attributes (occupation, disability status, family composition)
- Integrated **Google Gemini API** as a contextual chatbot on scheme detail pages; built an admin panel with full CRUD for scheme management and secure **bcrypt** authentication
- Designed a “For You” recommendation engine matching user profiles to eligible schemes; handled profile photo uploads via **Multer**

LEADERSHIP & INVOLVEMENT

Rajnath Prasad – YouTube Channel | [YouTube](#) | 10K+ Subscribers

2023 – Present

- Produce structured CS content on Python, SQL, and programming fundamentals; grew channel to 10K+ subscribers through consistent, beginner-focused technical tutorials
- Published 50+ videos organized into curated playlists, helping students simplify complex programming and CS concepts

Core Member – TEDxLNCT Bhopal

April 2024

- Collaborated with design and content teams on branding, digital media, and event logistics for a licensed TEDx campus event

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, TypeScript

Frontend: React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, Socket.IO, WebRTC, NextAuth.js, JWT, OAuth

Databases & ORM: PostgreSQL, MongoDB, MySQL, Prisma ORM

AI & Integrations: Google Gemini API, Hugging Face, Razorpay, Cloudinary

Tools & Platforms: Git, GitHub, Docker, Vercel, Render, Postman

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
